KEY ACHIEVEMENTS

Zero

critical incidents in the **SulAmérica → MetLife** migration — complete E2E coverage of financial flows in production

3M+

requests/day supported with **JMeter** in high-volume e-commerce — zero downtime during load peaks

E2E

full coverage of the **Carrefour/Mercado Livre Marketplace Out** via VTEX, ERP Gold and Digibee

Zero

critical defects post-deploy in the **Unimed Go Live** — E2E regression with BDD/TDD in corporate ERP

PROFESSIONAL EXPERIENCE

Senior QA Engineer · SDET

Sep 2025 – May 2026

C6 Bank (via Cadmus) · Fintech & Insurance

- Designed automated suite with **Robot Framework + Python** covering billing, BFF, policies, delinquency and insurance reactivation across 5+ critical financial modules
- Led E2E validation of the **SulAmérica → MetLife** migration — zero critical incidents in production, ensuring full operational continuity
- Executed mobile testing via **BrowserStack** (iOS/Android) and investigated incidents with MongoDB, DBeaver and Grafana
- Supported Dev, HML and Go Live across Agile/Scrum squads — 3+ releases validated without regressions

Stack: Robot Framework · Python · Postman · Swagger · MongoDB · DBeaver · BrowserStack · Grafana · Salesforce

Senior QA Automation Engineer

Oct 2024 – Sep 2025

AGF · Financial Systems & Investments (B3)

- Automated E2E tests with **Cypress + Python** for B3-integrated investment platforms — covering banking flows in Angular and Flutter
- Executed mobile testing with **Appium + Android Studio** and SQL validation — 6+ regulatory checkpoints per release without critical defects
- Defined E2E strategy and integration with test plans aligned to financial compliance requirements

Stack: Cypress · Python · Postman · REST APIs · SQL · Android Studio · Appium · Angular · Flutter

Senior QA Automation Engineer

Mar 2024 – Sep 2024

GBI Group · ERP & Enterprise Systems

- Designed E2E, integration and regression suite with **Robot Framework + Java** for large-scale ERP using BDD and TDD
- Unimed Go Live** with zero critical defects — full acceptance criteria validation and business flows per sprint
- Defined quality gates in collaboration with Dev, PO and stakeholders; reduced test cycle time by **30%**

Stack: Java · Robot Framework · Swagger · REST APIs · Azure DevOps · BDD · TDD · ERP Systems

QA Engineer · Marketplace & E-commerce

Jul 2022 – Feb 2024

Grupo Carrefour Brasil · Marketplace Out & Fulfillment

- Led E2E coverage of Marketplace Out — full implementation of **Mercado Livre at Carrefour** via CD ECJ (10,000+ transactions/day)
- Validated integrations between **VTEX, ERP Gold, Digibee, Janis and Miraki** — fulfillment, omnichannel and reverse logistics with no production incidents
- Executed API testing, SQL validation and defect analysis; supported operational stability post Go Live

Stack: Java · Postman · Camunda · DBeaver · Jira · Xray · Digibee · VTEX · ERP Gold · Confluence
